Dear Matt:

Re: Cable Concrete Products
International Erosion Control Systems (IECS)

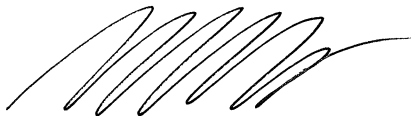

Our firm has had the opportunity to specify the use of cable concrete products manufactured by IECS on multiple projects.

Our clients and ourselves have been satisfied with not only the performance of the product in application, but also with the level of service IECS has provided during the planning, design and construction phases of these projects.

As a result, we will continue to inquire about new products and specify existing products where our firm believes they are appropriate for our specific design requirements.

Yours truly,

DIETRICH ENGINEERING LIMITED

Michel Terzian
