West Lorne Pre-Cast
R R 2
West Lorne, Ontario
NOL 2P0

Dear Sir:

In the past three years we have used approximately 3000 feet of cable concrete mats with filter cloth to repair erosion damage to our dyking system along the Thames River.

The placement of the West Lorne Pre-Cast cable concrete mats was well received by the protected landowners and our staff believe that the matting has and will continue to deter future erosion along the sections of protected dyke.

We thank you for assistance in providing us with material and we shall be certain to call your firm again should the need arise.

Yours truly,

Steve Piche
Works Superintendent
